## *Methodology and Transparency*

### **Target Population**

Registered Voters in Arizona, Statewide. Voters were randomly selected from the voter registration file purchased from i360. Of the voters surveyed, 60% have voted in between two and four of the last four general elections, 23.8% have voted in one of the last four general elections, and 16.2% have voted in none of the last four general elections.

### **Sampling Frame & Methodology**

#### Frame:

The sample frame includes registered voters with landline and cell phone telephones. Voters without a valid landline or cellular telephone number were not contacted.

#### Methodology:

Live survey; 60% landline telephone and 40% cellphone telephone.

Selected voters were contacted from September 30<sup>th</sup> to October 1<sup>st</sup>, 2021 using an all live survey presented in English.

## Sample Design

Contacted voters were selected randomly from a list of registered voters in the State of Arizona purchased by Data Orbital Consulting, LLC from i360. Individuals were randomly selected from the Voter File to mirror quotas for registered voters in Arizona. The interviewer asked for a specific member of the household but if that individual was not available, another registered voter in the household was accepted. CATI was utilized for this random sample survey.

## Weighting

The sample was weighted for gender, age, race, party affiliation, education attainment and geographic region to mirror registered voters in Arizona. Election data was sourced from i360 and the Arizona Secretary of State.

## Total Number of Respondents

550

## Margin of Error

± 4.18% (95% confidence interval)

Margin of error does not take into consideration design effect.
